

## **Environmental, Health, and Safety (EHS) Policy**

Rev. 0

Reynolds & Reynolds Electronics, Inc. (R&R) is a leading provider of traction and hydraulic emergency return units for elevators. Our Powervators® enable passengers to safely exit elevators during loss of building power.

R&R is committed to preventing pollution, injury and ill health, and achieving appropriate EHS corporate, industrial, local, state and federal regulatory and legal requirements.

We will develop and promote safe, efficient, environmentally friendly processes and procedures and seek ways to continually improve in order to maximize safety, minimize the consumption of materials and energy, and to minimize waste.

Our EHS is based on the ISO 14001 and OSHAS 18001 standards and we are committed to continually improving its effectiveness.
